GSM Security Systems

GSM-230 Boat Alarm

Product Information Sheet

GSM-230 Marine alarm system will alert you of any problems with security of your boat.

Text Messages & Phone Calls

Should an intruder be detected or the bilge reaches a dangerously high level a text message is sent to 5 numbers followed by phone calls.

Intruder detection

Simply learn wireless detectors into the panel. Once an intruder has been detected, the alarm will trigger notifying by text and calls. Wired sensors can also be added and the text message changed as required.

Audio Monitoring

Listen in to what is happening locally before calling the police or security.

Remote Control

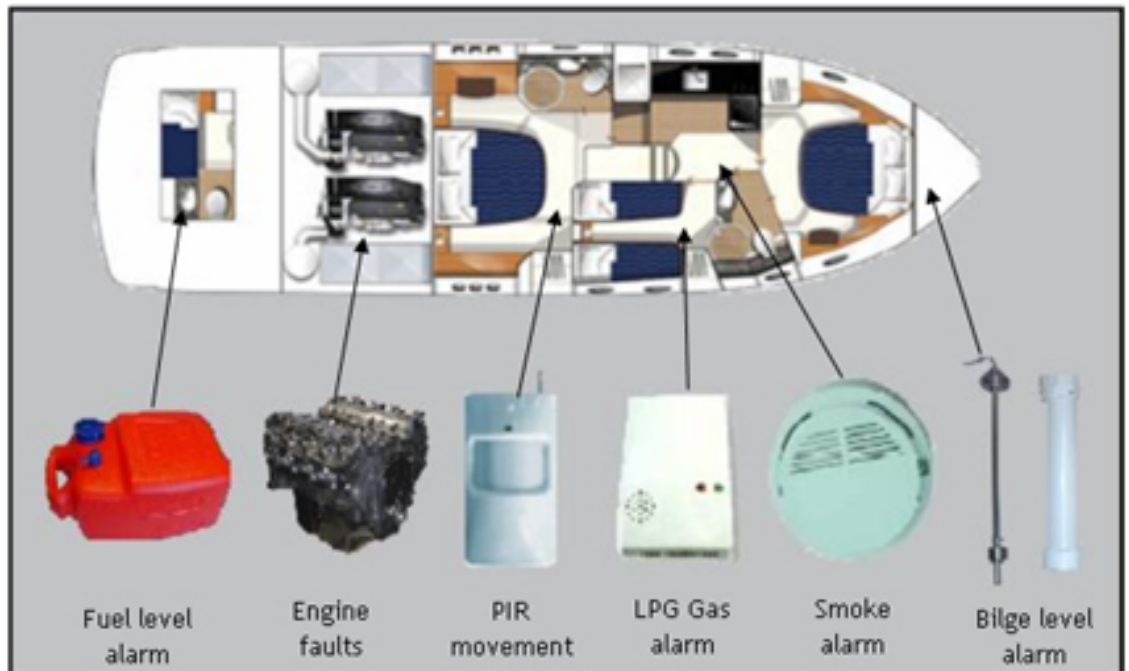

Connect the unit via relays to on board systems such as heating, cooling, generators and more and by a simple phone call switch on and off systems.
